What is HIT? HIT stands for Healthcare Information Technology. This catalog lists HIT related academic programs offering either certificate or degree programs.

For changes to our catalog please contact the Director of Communications, Janel Downing at Janel.Downing@jpsys.com and provide her with your academic program information.

Definition of Biomedical Informatics BMI develops, studies and applies theories, methods and processes for the generation, storage, retrieval, use, and sharing of biomedical data, information, and knowledge.

BMI builds on computing, communication and information sciences and technologies and their application in biomedicine. BMI investigates and supports reasoning, modeling, simulation, experimentation and translation across the spectrum from molecules to populations, dealing with a variety of biological systems, bridging basic and clinical research and practice, and the healthcare enterprise.
